TITAN[®]

ICE MELTER

TITAN[®] with PROPEL[®] provides the increased melt value of an expensive blend without the added cost.

FORMULATED WITH :

PROPEL[®]
DE-ICER ACCELERATOR

The faster an ice melter works, the less chance there is for a mishap to occur. That's why **TITAN[®]** is formulated with the powerful de-icing accelerator **PROPEL[®]** (U.S. Patent Pending). **PROPEL[®]** increases melting speed while extending the storage life of **TITAN[®]**. SHRP tests show that **TITAN[®]** exceeds the melt value of a 10% calcium chloride blend.

TRIPLE SCREENED PROFESSIONAL GRADE

Make sure your product goes where it does the most good - on the ice. With some of the tightest screening specifications in the industry, **TITAN[®]** is optimized for easy spreader application, drastically reducing dust and oversized particles.

BLUE COVERAGE INDICATOR

Eliminate wasted product and needless costs. **TITAN[®]**'s blue coverage indicator reduces common over application errors.

* Ice melting comparisons measured in milliliters using the testing method set up by the Strategic Highway Research Program H-205.1. Ice melters were tested at 15°F for 20 minutes.

At Ossian Inc., we don't guess or speculate on melting values or how we compare with the competition. We utilize strict SHRP melting standards to establish all our product claims and comparisons with competitors. Technical sheets along with competitive comparisons with **TITAN[®]** are available upon request.
